New Motorized Slide with Mounted Laser Applications

Generic Slides Expands the MS Slide Series

January 10, 2009

Glenshaw, PA, USA- Generic Slides, a nationwide leader in linear motion and positioning solutions, announces the introduction of the MS850Z series Z-Axis slide. The MS850Z slide, Generic Slides' newest addition to their MS Slide Series, utilizes motorized z-axis positioning, motorized travel, and repeatable z-axis positioning in combination with a fixed precision laser in order to provide quality laser engraving, cutting, and cladding in stand alone and automated laser systems.

MS850Z Slide Standard Features:

- Robust and Stable Mounting Platform
- Repeatable Positioning
- 2" Diameter Oversized Guide Rails
- High PV non-lube bearings
- Aluminum Construction with 62-Rc Hardcote Finish
- 12" Wide x 10" Long Footprint Table Top
- Acme Screw Driver with up to 48" of Motorized Travel on Z-axis*
- Stand-alone Unit with Control and Motor
- Integrated into Base

*(*can be tailored to buyer's specifications)*

The MS850Z series Z-Axis slide offers a wide range of table travel (up to 48 inches) ensuring that the mounted laser can be positioned for optimal performance.
